Dear Sir:

In accordance with your request for an estimate on packing your household effects which are in [REDACTED] and which were brought there originally through our agents, we submit the following estimate, after studying the question:

25X1A6a

1. Pictures, ornaments, etc.

These articles, which must be packed separately, will require a van of 22 cubic meters, 1,800 kilos total weight. *HHE*

2. Furniture, bedding, kitchen utensils, appliances, etc.

An estimated 45 cubic meters, 4,500 kilos total weight. *Q.P.*

We call your attention to the fact that the same household goods arrived in [REDACTED] in six crates weighing 9,206 kilos, 83,327 cubic meters, which, according to our calculation, makes a difference of 2,906 kilos and 16,327 cubic meters.

In our opinion, this difference is due to the weight of the packing, which was done in six crates, instead of four. This increased the cubic meters by about 16.

Very truly yours,

(signed)
